President's Message

It was great seeing all of you again and returning to some semblance of normalcy after an uncertain year.

I want to thank Bob Cleveland for putting together this month's presentation on Orchid Propagation. He will speak about how he pollinates his orchids and prepares the seeds to send to the lab. Bob will also talk about deflasking, preparing compots and potting up your seedlings. He will bring all the necessary supplies for this hands-on workshop and each participant will leave with new seedling. Perhaps in two or three years we will see these fully grown plants appear on our show table.

I also want to thank Caren Savone for volunteering to be our photographer and to Daryl Yerdon for offering to help with the website and to increase NHOS exposure on social media.

Finally, I want to thank all of you who give of your time and effort for the benefit of the Society. It is because of YOU that NHOS continues to run rather smoothly.

Many of you that we have not seen in a year came forward at last month's meeting and expressed appreciation for what we had done during Covid. I can't tell you how much that meant to myself and to the board. Thank you for your support.

Additionally, fallen orchids during monsoon from the locality will be rescued, restored and displayed within the campus of TIES as training for the staff. President's Message
(Con't from Pg. 1)

This month the Board is trying something new. We are having our Board Meeting via zoom on Thursday June 10th at 7:00 PM. The link is in the newsletter and anyone is welcome to attend. The thought being that if most of the work was done ahead of time, we could have a short meeting to approve the Manifest and any last-minute items on Saturday June 12th and be back downstairs sooner. The general meeting could then start right after show table judging and we would also be able to get to the show table results and speaker presentations much sooner.

For those of you not at last month's meeting, a request was made to the NHOS Conservation Committee to award a grant of \$900.00 for the purpose of "Developing an Orchid Library and Information Center: Capacity building at The Tropical Institutes of Ecological Sciences, Kottayam, India". The Board voted to approve the funds which will come from the NHOS Education and Conservation Fund and to add an additional \$100.00 to add book plates to those books that were purchased with the funds donated by the New Hampshire Orchid Society. A more detailed report can be found in the Board Meeting Minutes which can be found on our website and the member meeting minutes in the newsletter.

Due to new information, the Board did find it necessary to further revise certain portions of our By-Laws this year. They are included in this newsletter as we are required to give the membership approximately 60 days notice before they come up for a vote at our Annual Meeting in August.

I am so glad for the rain my lawn and garden are much happier now and I got some much-needed house cleaning accomplished.

**See you soon.

The 2021 Annual Meeting of the Native Orchid Conference, Inc. will take place via Zoom on June 15, 2021 beginning at 9:00 PM (EDT); 6:00 PM (Pacific).
Meeting ID: 830 4414 9132
Passcode: 098381

The Zoom session will feature a Business Meeting (including symposium update and election of officers), a mini auction and guest speaker, Tatyana Livschultz, PhD.

Tatyana Livschultz is associate professor in the Dept. of Biodiversity Earth and Environmental Sciences at Drexel University and curator of Botany at the Academy of Natural Sciences in Philadelphia. She earned degrees at University of Chicago (BA, Biology) and Cornell University (PhD, Plant Sciences.) She is a systematist and has contributed extensively to the reconstruction of evolutionary relationships in the dogbane and milkweed family (Apocynaceae.) Her current research focuses on the functional evolution of plant traits that mediate plant-animal interactions (e.g. flower defensive chemicals) to better understand how animals have shaped the evolution of plant diversity. Tanya's work has taken her to many parts of the world and she has published numerous papers. While the title of her presentation may seem a bit enigmatic, you are sure to be amazed at how it relates to orchids. This is a presentation that orchid aficionados of all stripes will find intriguing.
